

Journal of
Fluid Mechanics

VOLUME 878

VOLUME
87810 Nov.
2019

- 1 Fluid deformable surfaces
A. Voigt
- 5 Numerical stability analysis of a vortex ring with swirl
Y. Hattori, F. J. Blanco-Rodríguez & S. Le Dizès
- 37 Hairpin vortices and highly elongated flow structures in a stably stratified shear layer
T. Watanabe, J. J. Riley, K. Nagata, K. Matsuda & R. Onishi
- 62 Numerical investigation of nanofluid particle migration and convective heat transfer in microchannels using an Eulerian–Lagrangian approach
O. Z. Sharaf, A. N. Al-Khateeb, D. C. Kyritsis & E. Abu-Nada
- S 98 Formation of compound droplets during fragmentation of turbulent buoyant oil jet in water
X. Xue & J. Katz
- 113 Passive hovering of a flexible Λ -flyer in a vertically oscillating airflow
X. Zhang, G. W. He, S. Z. Wang & X. Zhang
- 147 Wave drag on asymmetric bodies
G. P. Benham, J. P. Boucher, R. Labbé, M. Benzaquen & C. Clanet
- 169 Odd-viscosity-induced stabilization of viscous thin liquid films
E. Kirkinis & A. V. Andreev
- S 190 Thermoacoustic interplay between intrinsic thermoacoustic and acoustic modes: non-normality and high sensitivities
F. M. Sogaro, P. J. Schmid & A. S. Morgans
- 221 Droplet–turbulence interactions and quasi-equilibrium dynamics in turbulent emulsions
S. Mukherjee, A. Safdari, O. Shardt, S. Kenjereš & H. E. A. Van den Akker
- 277 Convergent Richtmyer–Meshkov instability of a heavy gas layer with perturbed outer interface
J. Ding, J. Li, R. Sun, Z. Zhai & X. Luo
- 292 Numerical analysis of a leading edge tubercle hydrofoil in turbulent regime
B. Pena, E. Muk-Pavic, G. Thomas & P. Fitzsimmons
- 306 Span effect on the turbulence nature of flow past a circular cylinder
B. Font Garcia, G. D. Weymouth, V.-T. Nguyen & O. R. Tutty
- 324 Drops with insoluble surfactant squeezing through interparticle constrictions
J. R. Gissing, A. Z. Zinchenko & R. H. Davis
- 356 Rare transitions to thin-layer turbulent condensates
A. van Kan, T. Nemoto & A. Alexakis
- S 370 How dorsal fin sharpness affects swimming speed and economy
Q. Zhong, H. Dong & D. B. Quinn
- 386 Numerical study of bluntness effects on laminar leading edge separation in hypersonic flow
A. Khraibut, S. L. Gai & A. J. Neely
- 420 Exact regularised point particle (ERPP) method for particle-laden wall-bounded flows in the two-way coupling regime
F. Battista, J.-P. Mollicone, P. Gualtieri, R. Messina & C. M. Casciola
- 445 Wave power extraction from multiple oscillating water columns along a straight coast
S. Zheng, A. Antonini, Y. Zhang, D. Greaves, J. Miles & G. Iglesias
- 481 Extreme long waves over a varying bathymetry
J. G. Herterich & F. Dias
- 502 Stokes waves with constant vorticity: folds, gaps and fluid bubbles
S. A. Dyachenko & V. M. Hur
- 522 Stewartson-layer instability in a wide-gap spherical Couette experiment: Rossby number dependence
M. Hoff & U. Harlander
- S 544 Fast Stokesian dynamics
A. M. Fiore & J. W. Swan

Contents continued on inside back cover.

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published *semimonthly* in 24 volumes each year by Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS, UK/Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. The subscription price (excluding VAT but including postage) for volumes 858–881, 2019, is £4680 or \$8635 (online and print) and £4200 or \$7356 (online only) for institutions; £1296 or \$2400 (online and print) and £1260 or \$2142 (online only) for individuals. The print-only price available to institutional subscribers is £4513 (US \$7942 in USA, Canada and Mexico). Single volumes cost £216 (US \$380 in the USA, Canada and Mexico) plus postage. Orders, which must be accompanied by payment, should be sent to any bookseller or subscription agent, or direct to the publisher: Cambridge University Press, University Printing House, Shaftesbury Road, Cambridge CB2 8BS. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfillment Department, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Copies of the *Journal* for subscribers in the USA, Canada and Mexico are sent by air to New York. Periodicals postage is paid at New York, NY, and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Claims for missing issues can only be considered if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

COPYING

The *Journal* is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA which are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/2019/\$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

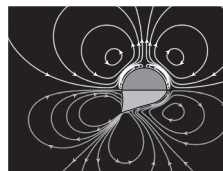

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *Journal of Fluid Mechanics* is available on cambridge.org/FLM. For further information on other Press titles access cambridge.org/.

Readers should note that where reference is made to a Web site for additional material relating to an article published in *Journal of Fluid Mechanics* this material has not been refereed and the Editors and Cambridge University Press have no responsibility for its content.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the World's forests. Please see www.fsc.org for information.

Printed in the UK by Bell & Bain Ltd.

The picture on the cover is based on figure 7(b) of 'Streaming-enhanced flow-mediated transport', by T. Parthasarathy, F. K. Chan & M. Gazzola.

- S 598 Perturbation theory for metal pad roll instability in cylindrical reduction cells
W. Herreman, C. Nore, J.-L. Guermond, L. Cappanera, N. Weber & G. M. Horstmann
- S 647 Streaming-enhanced flow-mediated transport
T. Parthasarathy, F. K. Chan & M. Gazzola
- S 663 Turbulent wake behind a concave curved cylinder
F. Jiang, B. Pettersen & H. I. Andersson
- 700 A population balance model for large eddy simulation of polydisperse droplet evolution
A. K. Aiyer, D. Yang, M. Chamecki & C. Meneveau
- 740 Sheared free-surface flow over three-dimensional obstructions of finite amplitude
A. H. Akselsen & S. Å. Ellingsen
- S 768 Subgrid-scale structure and fluxes of turbulence underneath a surface wave
K. Chen, M. Wan, L.-P. Wang & S. Chen
- 796 Experimental investigation of intermittent airflow separation and microscale wave breaking in wavy two-phase pipe flow
P. Vollestad, A. A. Ayati & A. Jensen
- S 820 Breakup and non-coalescence mechanism of aqueous droplets suspended in castor oil under electric field
S. Roy, V. Anand & R. M. Thaokar
- 834 A universal velocity profile for smooth wall pipe flow
B. J. Cantwell
- 875 Numerical investigation of wake flow regimes behind a high-speed rotating circular cylinder in steady flow
A. Munir, M. Zhao, H. Wu & L. Lu
- 907 The evolution of laminar thermals
J. W. Atkinson & P. A. Davidson
- 932 CORRIGENDUM

JFM Rapids (online only)

- R1 Universal fluctuations in the bulk of Rayleigh–Bénard turbulence
Y.-C. Xie, B.-Y.-C. Cheng, Y.-B. Hu & K.-Q. Xia
- S R2 Gliding on a layer of air: impact of a large-viscosity drop on a liquid film
K. R. Langley & S. T. Thoroddsen
- R3 Diffusion coefficients of elastic macromolecules
B. Cichocki, M. Rubin, A. Niedzwiecka & P. Szymczak
- R4 Predicting vortex merging and ensuing turbulence characteristics in shear layers from initial conditions
A. Guha & M. Rahmani
- S R5 A stable tripole vortex model in two-dimensional Euler flows
A. Viúdez
