ISSN 0022-1120

Journal of Fluid Mechanics

10 May 2012

1 Survival hydrodynamics
M. S. Triantafyllou

S 5 C-start: optimal start of larval fish
M. Gazzola, W. M. Van Rees & P. Koumoutsakos

19 Energy spectra of stably stratified turbulence
Y. Kimura & J. R. Herring

51 Magnetohydrodynamic drift equations: from Langmuir circulations to magnetohydrodynamic dynamo?
V. A. Vladimirov

62 Marine ice sheet stability
C. Schoof

73 Generalized two-dimensional Lagally theorem with free vortices and its application to fluid–body interaction problems
C. T. Wu, F.-L. Yang & D. L. Young

93 Wavelet analysis of near-field pressure fluctuations generated by a subsonic jet
S. Grizzi & R. Camussi

125 The influence of surfactant on the propagation of a semi-infinite bubble through a liquid-filled compliant channel
D. Halpern & D. P. Gaver III

160 Where do small, weakly inertial particles go in a turbulent flow?
M. Gibert, H. Xu & E. Bodenschatz

168 On the transition from finite-volume negatively buoyant releases to continuous fountains
O. J. Myrtroeen & G. R. Hunt

185 Asymptotic analysis of a Hiemenz flow in a low-porosity medium with phase change
M. A. E. Kokubun & F. F. Fachini

211 On the generation of steady streamwise streaks in flat-plate boundary layers
J. H. M. Fransson & A. Talamelli

235 Direct numerical simulation of a $30R$ long turbulent pipe flow at $R^+ = 685$: large- and very large-scale motions
X. Wu, J. R. Baltzer & R. J. Adrian

282 First- and second-order forcing expansions in a lattice Boltzmann method reproducing isothermal hydrodynamics in artificial compressibility form
G. Silva & V. Semiao

304 Third-order theory for multi-directional irregular waves
P. A. Madsen & D. R. Fuhrman

335 Effective transition of steady flow over a square leading-edge plate
M. C. Thompson

Contents continued on inside back cover.

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published *semimonthly* in 24 volumes each year by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK/Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA. The subscription price (excluding VAT but including postage) for volumes 690–713, 2012, is £2812 or $5190 (online and print) and £2530 or $4432 (online only) for institutions; £803 or $1487 (online and print) and £785 or $1364 (online only) for individuals. The print-only price available to institutional subscribers is £2650 (US $4665 in USA, Canada and Mexico). Single volumes cost £120 (US $213 in the USA, Canada and Mexico) plus postage. Orders, which must be accompanied by payment, should be sent to any bookseller or subscription agent, or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, NY 10994-2133. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Copies of the *Journal* for subscribers in the USA, Canada and Mexico are sent by air to New York. Periodicals postage is paid at New York, NY, and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133. Claims for missing issues can only be considered if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

COPYING

The Journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA which are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/2012/$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *Journal of Fluid Mechanics* is available on http://www.jfm.damtp.cam.ac.uk/ and it is included in the Cambridge Journals Online service which can be found at journals.cambridge.org/. For further information on other Press titles access cambridge.org/.

Readers should note that where reference is made to a Web site for additional material relating to an article published in *Journal of Fluid Mechanics* this material has not been refereed and the Editors and Cambridge University Press have no responsibility for its content.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the World's forests. Please see www.fsc.org for information.

Printed by the University Press, Cambridge, UK.

The picture on the cover is based on figure 7 of 'C-start: optimal start of larval fish', by M. Gazzola, W. M. Van Rees & P. Koumoutsakos.

© Cambridge University Press 2012

358 On the connection between the magneto-elliptic and magneto-rotational instabilities
K. A. Mizerski & W. Lyra

374 A new model of roll waves: comparison with Brock's experiments
G. L. Richard & S. L. Gavrilyuk

406 An analytically predictive model for moderately rarefied gas flow
T. Veltzke & J. Thöming

423 Slender-body theory for the generation of micrometre-sized emulsions through tip streaming
E. Castro-Hernández, F. Campo-Cortés & J. M. Gordillo

446 Boundary-element method for the prediction of performance of flapping foils with leading-edge separation
Y. Pan, X. Dong, Q. Zhu & D. K. P. Yue

468 Relevance of local parallel theory to the linear stability of laminar separation bubbles
S. S. Diwan & O. N. Ramesh

S indicates supplementary data or movies available online.
