

- 1 Sinking inside the box
D. Pritchard
- 5 Growth and dissipation of wind-forced, deep-water waves
L. Grare, W. L. Peirson, H. Branger, J. W. Walker, J.-P. Giovanangeli & V. Makin
- 51 Turbulent wake past a three-dimensional blunt body. Part 1. Global modes and bi-stability
M. Grandemange, M. Gohlke & O. Cadot
- 85 Transient fluid-combustion phenomena in a model scramjet
S. J. Laurence, S. Karl, J. Martinez Schramm & K. Hannemann
- 121 Rigid ring-shaped particles that align in simple shear flow
V. Singh, D. L. Koch & A. D. Stroock
- 159 Radial lift on a suspended finite-sized sphere due to fluid inertia for low-Reynolds-number flow through a cylinder
S. Bhattacharya, D. K. Gurung & S. Navardi
- 187 Response of a hypersonic turbulent boundary layer to favourable pressure gradients
N. R. Tichenor, R. A. Humble & R. D. W. Bowersox
- 214 Blood flow in small tubes: quantifying the transition to the non-continuum regime
H. Lei, D. A. Fedosov, B. Caswell & G. E. Karniadakis
- 240 Travelling convectons in binary fluid convection
I. Mercader, O. Batiste, A. Alonso & E. Knobloch
- 267 Turbulent drag reduction through rotating discs
P. Ricco & S. Hahn
- 291 Dynamics and stability of the wake behind tandem cylinders sliding along a wall
A. Rao, M. C. Thompson, T. Leweke & K. Hourigan
- S 317 The importance of bubble deformability for strong drag reduction in bubbly turbulent Taylor–Couette flow
D. P. M. van Gils, D. Narezoz Guzman, C. Sun & D. Lohse
- 348 Wavy liquid films in interaction with a confined laminar gas flow
G. F. Dietze & C. Ruyer-Quil
- 394 Electrokinetic flows about conducting drops
O. Schnitzer, I. Frankel & E. Yariv
- 424 Direct numerical simulation of a breaking inertia–gravity wave
S. Remmler, M. D. Fruman & S. Hickel
- S 437 The trapping and release of bubbles from a linear pore
G. Dawson, S. Lee & A. Juel
- 461 Resonance theory of water waves in the long-wave limit
T. Kataoka
- 496 Lubrication theory for electro-osmotic flow in a slit microchannel with the Phan-Thien and Tanner model
O. Bautista, S. Sánchez, J. C. Arcos & F. Méndez
- 533 Receptivity of a high-speed boundary layer to temperature spottiness
A. V. Fedorov, A. A. Ryzhov, V. G. Soudakov & S. V. Utyuzhnikov
- 554 Invariant recurrent solutions embedded in a turbulent two-dimensional Kolmogorov flow
G. J. Chandler & R. R. Kerswell
- 596 Turbulent flow in the bulk of Rayleigh–Bénard convection: small-scale properties in a cubic cell
M. Kaczorowski & K.-Q. Xia
- 618 Stability and sensitivity analysis in a simplified solid rocket motor flow
G. Boyer, G. Casalis & J. L. Estivalèzes
- S 645 Self-similar coalescence of clean foams
P. S. Stewart & S. H. Davis

Contents continued on inside back cover.

Journal of Fluid Mechanics

VOLUME 722

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published *semimonthly* in 24 volumes each year by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK/Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA. The subscription price (excluding VAT but including postage) for volumes 714–737, 2013, is £3037 or \$5605 (online and print) and £2657 or \$4654 (online only) for institutions; £867 or \$1606 (online and print) and £824 or \$1432 (online only) for individuals. The print-only price available to institutional subscribers is £2902 (US \$5108 in USA, Canada and Mexico). Single volumes cost £131 (US \$233 in the USA, Canada and Mexico) plus postage. Orders, which must be accompanied by payment, should be sent to any bookseller or subscription agent, or direct to the publisher: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU. Subscriptions in the USA, Canada and Mexico should be sent to Cambridge University Press, Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, NY 10994-2133. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan. Prices include delivery by air. Copies of the *Journal* for subscribers in the USA, Canada and Mexico are sent by air to New York. Periodicals postage is paid at New York, NY, and at additional mailing offices. POSTMASTER: send address changes in USA, Canada and Mexico to *Journal of Fluid Mechanics*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133. Claims for missing issues can only be considered if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press.

COPYING

The *Journal* is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA which are also registered with CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/2013/\$16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, USA is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Information on *Journal of Fluid Mechanics* is available on journals.cambridge.org/FLM. For further information on other Press titles access cambridge.org/.

Readers should note that where reference is made to a Web site for additional material relating to an article published in *Journal of Fluid Mechanics* this material has not been refereed and the Editors and Cambridge University Press have no responsibility for its content.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the World's forests. Please see www.fsc.org for information.

Printed in the UK by MPG Printgroup Ltd.

The picture on the cover is based on figure 4 of 'Optimal shapes for anguilliform swimmers at intermediate Reynolds numbers', by W. M. van Rees, M. Gazzola & P. Koumoutsakos.
